

How to add research (updated 13/04/2021)

EIT (Eastern Institute of Technology)

For student research outputs the library works with EIT's Research and Innovation Centre to obtain graduate and masters theses.

Staff please contact the Research and Innovation Centre. Email ric@eit.ac.nz

Otago Polytechnic

Students [please click here for an online form](#)

Staff please email opres@op.ac.nz

Toi Ohomai Institute of Technology

Students [please click here](#) to go to the Research Submission page.

Staff please contact the Research Office. Email research@toiohomai.ac.nz

Unitec Institute of Technology

Staff members simply add research to the Research Outputs Management System

(ROMS). <http://unitec.roms.intuto.com>

For student research outputs the library works with Unitec's Research Office to obtain graduate and masters theses

Copyright clearance for your research

While theses, conference papers, posters and working papers are normally acceptable in their final format, copyright is often an issue when it comes to making journal articles openly accessible via the web. In the vast majority of cases, copyright over an article is transferred to the journal publisher. Despite this, most journal publishers **do allow** authors to make their work open access, albeit with some restrictions on the format of the paper you use.

Usually, publishers do not allow authors to post the final, published version of a paper on the Internet. However, the majority of large publishers *do allow* you to use your *final draft* version of the paper, which should be identical in *content* to the published version, although the formatting may be quite different. In almost all cases where the use of the final draft *is* permitted, the publisher also insists on the inclusion of a set phrase that identifies the definitive version of the paper as their own, together with a link to their authorised version.
